SUMMARY

Software Engineer with strong foundations in full-stack development. Experienced in building SaaS applications and APIs using JavaScript (MERN stack, Next.js). Skilled with relational and NoSQL databases (PostgreSQL, MongoDB). Familiar with integrating AI powered features and third party services to enhance functionality and to solve real world problems. Eager to contribute to next generation applications and drive innovative solutions in collaborative software development teams

EDUCATION

FAST - National University of Computer and Emerging Sciences, Lahore

Bachelors in Computer Science (BSCS)

2021 - 2025

Lahore College of Arts and Sciences (LACAS)

A-Level in Computer Science

2019 - 2021

EXPERIENCE

Vehtual - Software Engineer | *React.js, Next.js, Node.js, Firebase, Supabase*

Feb 2026 - Present

- Developed scalable web applications using JavaScript libraries/frameworks and PostgreSQL/Firebase.
- Contributed to the development and maintained features on a firebase backed legal full stack web application in a multi developer agile environment.
- Participated in code reviews, debugging, testing, and deployments to ensure high quality software releases.
- Developed the full stack architecture of a corporate platform which included an administrative CMS, multi-step career application portal, content management dashboards for jobs and blogs with real time cloud storage uploads and background email execution for enhanced user experience.

Tinkerbyte Labs - Associate Software Engineer | *MERN, Next.js*

Jun 2025 - Jan 2026

- Developed and maintained milestone-based payments, dispute resolution and content management system for a multi-vendor e-commerce platform and implemented Stripe Checkout workflows with webhook handling.
- Built a LinkedIn outreach automation SaaS system integrating third-party APIs for automated networking.
- Improved backend performance by using asynchronous background job queues, applying cache-based optimizations and implementing frontend caching to reduce redundant requests and enhance user experience.
- Collaborated with designers and product teams to translate requirements into scalable user-facing features.
- Contributed to CI/CD workflows, code reviews and deployment processes to ensure stability.

PROJECTS

Lumo - Disposable Camera | *Next.js, Node.js, Express.js, Supabase*

[Live](#) | 2026

- Built a multi-tenant SaaS where hosts create timed "disposable camera" events and guests join via QR code without any login using Next.js, Node.js and Supabase with Row Level Security for per-host data isolation.
- Implemented in-browser camera capture, client-side vintage-style image processing, per device shot limits, cloud image uploads and scheduled gallery unlocks so photos stay hidden until the host's reveal time.

Legal Case CRM | *Next.js, Supabase*

2026

- Engineered a comprehensive legal case management SaaS featuring an interactive Kanban workflow board, e-signatures, in-browser document rendering and case specific billing/time tracking dashboards.
- Leveraged TanStack query for high performance data fetching, caching and state synchronization.
- Implemented role-based access control and secure document management workflows.

Legal Tech Suite | *React.js, Node.js, Express.js, Firebase, Cloud Functions*

2026

- Built and maintained the partner portal ecosystem including provider onboarding, service management and booking/review workflows, along with CRM tools for managing partner applications, approval lifecycles and service visibility aligned with the partner portal.

Final Year Project - Virtual Try Room | *Python, OpenCV, MediaPipe, React, React Native, Node, Firebase*

2025

- Developed a cross platform virtual try-on application enabling users to try clothes in real time using a webcam or a mobile camera.
- Utilized OpenCV and MediaPipe for real-time pose estimations to extract measurements from live camera input.
- Implemented garment overlay and role based assess for customers and clothing companies.

TECHNICAL SKILLS

- Web Development** - React.js, Next.js, Node.js, Express.js, HTML, CSS, Bootstrap, Tailwind
- App Development** - React Native
- Tools/Technologies** - Git, GitHub, Docker, Redis, Postman, AWS
- Databases** - MySQL, MS SQL Server, PostgreSQL, Firebase, MongoDB, Supabase
